COMPANY CAPABILITY BROCHURE

Precision Sheet Metal Fabrication & Architectural Metalwork

High-precision manufacturing, custom fabrication and installation services for builders, architects, developers and contractors across Western Australia.

WHO WE ARE

Engineering-led metal fabrication, built for architectural projects

At PerfMet Engineering, we provide high-precision sheet metal fabrication and architectural metalwork services for builders, architects, developers and contractors across Western Australia.

Our Wangara facility is equipped with modern CNC equipment and advanced fabrication machinery, allowing us to manufacture everything from architectural façade components and screening systems to custom metal fabrications and structural elements.

By combining skilled tradespeople, modern equipment and strong project management, PerfMet delivers reliable manufacturing solutions for projects of all sizes.

PerfMet provides a full range of in-house sheet metal manufacturing services, ensuring quality control, faster production times and consistent results across every project — from first drawing through to on-site installation.

WHAT WE DO

Our Fabrication Capabilities

1

CNC Turret Punching

Amada CNC Turret Punch System — 2 machines

High-speed precision punching for architectural and industrial sheet metal applications, producing accurate and repeatable components for façade systems, plant screens, balustrades and enclosures.

- Perforated panels & architectural screening
- Ventilation panels & louvre components
- Custom punch patterns
- High-volume sheet processing
- Complex hole patterns & forming features

2

CNC Brake Press Folding

Precise folds & complex profiles

Consistent folds, tight tolerances and clean finishes suitable for architectural applications, delivered by our experienced fabrication team.

- Architectural cladding panels
- Flashings & trims
- Louvre blades & frames
- Planter boxes & enclosures
- Structural brackets & components

3

Guillotine Cutting

Industrial guillotine blanking

Accurate sheet metal blanks prepared prior to forming or fabrication, enabling efficient preparation for large-scale manufacturing runs.

- Aluminium
- Stainless steel
- Mild steel
- Pre-finished architectural metals

4

CNC Router Cutting

Precision profiling & complex shapes

Precise profiling of aluminium, composite panels and specialty materials, producing complex shapes and architectural designs with precision and consistency.

- Architectural screens & panels
- Custom signage panels
- Decorative metalwork
- Aluminium composite panel cutting
- Custom façade elements

CUSTOM WORK

Custom Metal Fabrication & Finishing

Custom Metal Fabrication

PerfMet specialises in custom metal fabrication for architectural and commercial projects. Our workshop team works closely with our design and drafting department to ensure every fabricated component is accurate, buildable and ready for installation.

- Welding & assembly
- Structural metalwork
- Architectural screens
- Balustrades & fencing
- Gates & entry features
- Plant room enclosures
- Custom metal structures

METAL FINISHING & TREATMENTS

Finished to architectural & durability standards

PerfMet works with leading finishing partners to ensure all fabricated components meet architectural and durability requirements — suitable for coastal environments, commercial buildings and long-term durability.

Powder Coating

Durable architectural powder coating in a wide range of colours and finishes.

Anodising

High-quality anodised finishes for aluminium architectural components.

Galvanising

Hot-dip galvanising for corrosion protection of steel components.

Specialty Finishes

Interpon architectural coatings, textured, metallic & marine-grade finishes.

Materials We Work With

Aluminium | Stainless Steel | Mild Steel | Perforated Metals | Aluminium Composite Materials

ON-SITE DELIVERY

Installation Services

PerfMet provides professional installation services for many of our architectural systems. Our experienced installation team works with builders and project managers to ensure efficient and safe installation on site.

Our team understands construction programs and works closely with project managers to deliver installations on time and to specification.

- Architectural screens
- Louvre systems
- Balustrades & fencing
- Plant room enclosures
- Gates & entry features
- Custom metal structures

FULL PROJECT DELIVERY

Design to Installation

PerfMet provides a complete project delivery service — ensuring projects move smoothly from concept to completion.

1. **Shop Drawings & Drafting**
2. **Engineering Coordination**
3. **Manufacturing**
4. **Surface Finishing**
5. **Site Installation**

> ***"This integrated approach ensures projects move smoothly from concept to completion — from shop drawings through to final on-site installation."***

PERFMET

WHY WORK WITH PERFMET

Trusted by builders, architects & developers across WA

- Modern CNC manufacturing equipment
- Skilled fabrication team
- Architectural project experience
- Reliable delivery & project coordination
- Capability for both custom fabrication and production manufacturing
- Integrated design-to-installation project delivery

PerfMet is trusted by builders, architects and developers to deliver high-quality metalwork across commercial, residential and public projects.

Let's Build Something. Contact our team today to discuss your project.
